

CASE STUDY

New playground shelter at Hartland Primary School

Donna Weeks of Hartland Primary School, near Bideford in Devon, contacted Zenith for a quotation for a canopy to be installed in their grounds for an outdoor seating area.

There was limited shade in the school playground and they wanted a multi-use covered area for outdoor eating that could be used all year round. In addition, they wanted to use it as an outdoor classroom during the summer months.

The school had done their research and realised that children who spend time outdoors are generally happier than those who stay indoors. It improves their mental wellbeing and self-esteem and stimulates their imagination.

Craig Gilbert of Zenith carried out a site survey and as a result Donna placed her order for 1 x 6m x 6m Airone Tipo 150 for installation at the start of the school Spring term in January.

The installation is now complete. Donna said “we are delighted with the canopy. It looks great, we cannot wait for all the children to be back in school to make good use of it once the lockdown is over”.

The galvanised steel framework, powder coated in green with beige PVDF coated PVC canopy fits perfectly within the environment.

Donna also said “thank you to the team who installed the canopy, they were great”.
