

CASE STUDY

Another Zenith Canopy Installed at Highdown School, Reading

Michael Jones the Estates Manager at Highdown School in Reading, contacted Zenith Canopy Structures to purchase another canopy for his school. Zenith had already installed 2 x 8m x 8m Airone Max 175 structures in 2008 and 2009 respectively.

This time, Michael required Zenith to replace an existing sail canopy provided by others with an alternative structure in front of their 6th form catering pod.

Ian Manners of Zenith, who carried out the site survey, quoted for 1 x 6m x 6m Airone Tipo 150 or 1 x 6m x 6m Cicogna 150. After consideration, Michael selected the Cicogna 150 with a RAL 7035 light grey frame and a RAL 3000 red canopy.

The canopy was installed during the Autumn term and fits perfectly in front of the catering pod.

Michael Jones was delighted with the end result and said 'it is a perfect replacement to protect our students from inclement weather as it can now be used all year round.'

The Cicogna 150 is available in standard modular sizes from 3m x 3m up to 7m x 7m or can be manufactured to specific sizes if required. The galvanised steel framework can be powdercoated in a choice of standard colours. The soft PVC canopies are also available in a variety of standard colours.

In addition, the Cicogna 175 is the larger profile version and can be manufactured in sizes from 7m x 7m up to 9m x 9m. The structures meet wind and snow loads to UK Building Regulations.

Zenith carry out annual cleaning, maintenance and safety checks on all their canopies. Prices on quote.
