

CASE STUDY

Wembley Primary School

Zenith were contacted by Tom Sheerin, the Site Manager at the school and invited Craig Gilbert of Zenith to discuss the various canopies available as they required an outdoor covered seating area.

After careful consideration Tom selected 2 x 6m x 6m Airone Tipi 150 joined together to cover the outdoor seating area adjacent to the playground and playing fields. The canopies are now used as an eating area, outdoor classroom or a general meeting point for the children.

Tom selected the galvanised steelwork in RAL 3000 red to match the school colours and canopies in 650gsm Beige 226.

The soft PVC canopies are UV resistant, fire retardant and fully waterproof.

The Airone Tipi 150 system is modular and available in standard 4m, 5m, 6m and 7m sizes but can be made to special order. The structures meet UK Building Regulations for wind and snow loadings.
